PROFILE

I am an enthusiastic IT undergraduate with a strong passion for full-stack development and continuous learning. I enjoy exploring new technologies, solving problems through code, and building projects that create real value. With a positive mindset and strong willingness to grow, I am seeking an internship or junior developer role where I can apply my skills, collaborate with a team, and contribute to impactful software solutions.

ACADEMIC PROJECT

INVENTORY MANAGEMENT SYSTEM :- BEYOND LIMITS

- Developing a full-stack SPA web application with CSR
- Functionality like stock management, purchase management, sells management, purchase order management, and many more.
- Developing using reactjs for frontend with RestAPI and php for backend.
- Planed the system architecture and enhance the overall user interface.
- Source code on GITHUB:
<https://github.com/Bikashxkhanal/Inventory-Management-System>

EXPERIENCE

DATA ANNOTATION INTERN • SEPTEMBER - NOVEMBER 2025

NextWaveAI – Kathmandu

- Strong attention to detail ensuring data and application accuracy.
- Improved collaboration and communication within technical teams.
- Understanding of data flow and basic machine learning concepts, useful for backend logic and data handling.
- Ability to follow technical guidelines and maintain consistency in project standards.
