PROFILE

I am an enthusiastic and dedicated BCSIT undergraduate with a strong passion for network engineering and a genuine commitment to continuous learning. I possesses solid foundational knowledge of subnetting, VLAN configuration, inter-VLAN routing, OSPF, ACLs, DHCP, and NAT/PAT, developed through academic coursework, hands-on training, and the three-course Cisco CCNA curriculum. A fast learner who works well with others and communicates clearly, especially when solving technical problems. Looking to take the next step by working alongside experienced professionals, learning how networks operate in real settings, and building a strong foundation for a career in network engineering.

TECHNICAL SKILLS

Networking Fundamentals: OSI & TCP/IP Models, IPv4/IPv6 Addressing, Subnetting & VLSM, Ethernet, Cabling
Switching & Network Access: VLANs, 802.1Q Trunking, Inter-VLAN Routing, STP/RSTP, EtherChannel, Wireless LAN Basics
Routing Protocols: Static Routing, OSPFv2 ,First-Hop Redundancy Concepts
Network Services: DHCP, NAT/PAT, DNS, NTP, Syslog, SNMP, QoS Concepts
Network Security: Access Control Lists (ACL), Port Security, DHCP Snooping, SSH, AAA
Automation & Programmability: SDN Concepts, REST APIs, JSON, Configuration Management Tools
Tools & Troubleshooting: Cisco Packet Tracer, Cisco IOS CLI

PROJECTS

Secured Multi-VLAN Campus Network (Cisco Packet Tracer)

- Designed and configured a switched LAN with multiple VLANs, trunk links, and router-on-a-stick inter-VLAN routing.
- Implemented DHCP for automatic addressing and ACLs to restrict traffic between departments.

Multi-Router OSPF Network with NAT/PAT (Cisco Packet Tracer)

- Built a multi-router topology using VLSM subnetting and OSPF for dynamic routing between branch networks.
- Configured NAT/PAT for internet access and verified connectivity using ping, traceroute, and show commands.

SOFT SKILLS

- Strong communication and interpersonal skills
- Quick learner, adaptable to new tools and technologies
- Attention to detail and troubleshooting focus

TRAINING & CERTIFICATION

Cisco Summer of Love – CCNA Programs (All 3 Courses Completed)

- CCNA 1: Introduction to Networks
- CCNA 2: Switching, Routing, and Wireless Essentials
- CCNA 3: Enterprise Networking, Security, and Automation

Network Administration Training
Completed a 25 hours network training conducted by college in collaboration with Tech Enablers Pvt. Ltd.

EDUCATION

Bachelor of Computer System and Information Technology (BCSIT)
Pokhara University - 2024 - Present

DECLARATION

I hereby declare that the information provided above is true and accurate to the best of my knowledge.
